## USER GUIDE

- 1- Parts 1, 2, 3 are tightened by hand, respectively.
- 2- We unscrew the nut on the metal body for the foot part and tighten it with the help of 13 wrench to the connection point shown with number 4 so that the cable passes through it.
- 3- In this step, we connect the cable coming out of the box to the joint under the panel as shown in the diagram 5, and tighten the plastic protection parts with the help of pliers, thus completing our electrical connection.

\*Install the floor lamp head, which comes disassembled, with the ears of the fabric inside.

In the next step, attach the plastic hoops to the head.

\*\*In this step, we attach the lamp head to the socket connection point shown in the diagram and tighten the washer.
